A scenic coastal landscape featuring a row of trees on a cliff overlooking the ocean. The trees have a mix of green and yellow foliage, suggesting autumn. The cliff is composed of grey rock and has some red soil or sand at its base. The ocean is a vibrant blue, and the sky is a lighter blue with some white clouds. The overall scene is bright and clear.

Climate, sustainability and environmental – a network in Naturvejledning Danmark.

How does the network work, and how do we work with these subject in the network.

About the network

- Join in and shape the network!
- Tara and Maja are coordinators - for now.
- The network is 1 year old
- 26 members at our first day, 30 on our mailing list and 107 in FB group.
- We have had 2 network days and one to come.

Method– lectures from professionals with different professions and perspectives on climate changes and sustainability

Jesper Theilgaard a well-known meteorologist. To give background understanding about climate, to start forming a common language also about weather, water and nature - with climate as focus point.

- **The network starts living, when...**

Members participate. Our most valuable asset in NV DK.

With a brain storm we find focus and subjects we would like to learn about.

Now – it's up for grabs – who would like to host and **coordinate** network days for 1,5 year . Focus, dates and names is decided.

Method: visit other NV, knowledge sharing

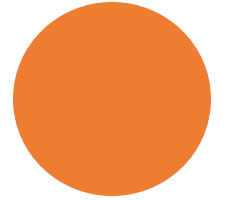

Sustainability, food and children.

- **Presentation by Kirsten Sterling, Insekteriet:** how does students work in the food lab, with food formation, and climate footprint.
- How can we teach in sustainability, food and habits? In a practical and naturvejleder- way?
- We use inputs from each other to develop our practice at home.

Method: visit external learning environments, that can give another perspective

- **Guided tour at Energi& Vand:** to see how they work with climate and climate adaption
- **workshops** with focus on sea level rise, increased precipitation and temperture, food and water quality.
- **Yearly network meeting**, planning for the next 1,5 year.
- We will see how they work with climate and climate adaption at Energi & Vand

And now – you!

- 2 minutes to write/ draw
- A few chares

What are the most important keywords in your work, relating to climate, sustainability and environment?

Water as an example

"En Verden af Vand" - et science-pædagogisk materiale til dagtilbud — Forskningens Døgn
